Art Unit: 3682

DETAILED ACTION

Priority

- 1. Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy has been filed in parent Application No. 09/467,917, filed on 12/21/99. *Information Disclosure Statement*
- 2. The IDS, filed 1/20/04, has been considered in full.

Drawings

3. The drawings, as originally filed, are acceptable as formal.

Claim Rejections - 35 USC § 112

- 4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 5. Claim 11 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims recite that the adjustments are done "automatically". This is indefinite since it is not clear how the adjustment can be automatic. It would seem that the adjustments would need to be initiated by the operator, and thus, are not automatic.

Claim Rejections - 35 USC § 102

Application/Control Number: 10/759,431 Page 3

Art Unit: 3682

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that

form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United

States.

7. Claims 11 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by

Arvidsson (5,035,446 - cited on IDS of 1/20/04).

type (see e.g. Forbes-Robinson et al. 5,992,863)

Arvidsson shows the claimed invention including tilt and length adjusting drive members (20, 21) in the form of threaded rods (23, 27), the threaded rods are connected to brackets (25, 29). Upon actuation of the drive members (20, 21), the steering column either tilts (using drive member 21) or adjusts the length (using drive member 20 which slides the inner column member with respect to the outer column member). An auxiliary member (11) being attached to the inner side of the inner column member in advance (the members must be assembled in advance of installing in the vehicle). The lower portion of the steering column (as at 14) is connected to the subsequent linkages by a universal joint which is inherent in all steering columns of this

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to

applicant's disclosure.

Forbes-Robinson et al.; Wilson, Tomaru et al.; Yoshizawa et al. all show steering

columns which adjust.

9. The following are suggested formats for either a Certificate of Mailing or Certificate of Transmission under 37 CFR 1.8(a). The certification may be included with all correspondence concerning this application or proceeding to establish a date of mailing or transmission under 37 CFR 1.8(a). Proper use of this procedure will result in such communication being considered as timely if the established date is within the required period for reply. The Certificate should be signed by the individual actually depositing or transmitting the correspondence or by an individual who, upon information and belief, expects the correspondence to be mailed or transmitted in the normal course of business by another no later than the date indicated.

Certificate of Mailing

I hereby certify that this correspondence is being deposited with the United States Postal Service with sufficient postage as first class mail in an envelope addressed to:
Commissioner for Patents P.O. Box 1450 Alexandria, VA 22313-1450
on (Date)
Typed or printed name of person signing this certificate:
Signature:
Certificate of Transmission
I hereby certify that this correspondence is being facsimile transmitted to the United States Patent and Trademark Office, Fax No. (703) on (Date)
Typed or printed name of person signing this certificate:
Signature:

Please refer to 37 CFR 1.6(d) and 1.8(a)(2) for filing limitations concerning facsimile transmissions and mailing, respectively.

Application/Control Number: 10/759,431

Art Unit: 3682

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David M. Fenstermacher whose telephone number is 703-305-7438. The examiner can normally be reached on 9:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Bucci can be reached on 703-308-3668. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
